General instructions for conservation and disposal of the products

We created different categories for every hour during the day with excellent raw materials whose emergence is made through their proper management, both during the storage and display at the points of sale. So, follow the instructions bellow for both defrosting and conservation, and baking procedure, if it is necessary. The products are deep frozen and according to their category are subjected to different handling.

INSTRUCTIONS FOR THE PRODUCT MANAGEMENT

- All products must be stored in the freezer (-18oC)
- The shelf-life of products in the freezer (-18oC) is written on the label of each product
- Refreezing is forbidden
- After baking, products must be consumed within 2-3 hours, so you must make sure that the quantity which is baked is sufficient to be consumed within this time period.

BAKING INSTRUCTIONS

- You can find baking instructions for each category in this brochure
- Baking time and temperature are indicative and depend on the type of oven available
- DEFROSTING symbol means that, for better results, you should defrost the product in ambient temperature for 30 minutes before baking
- For better appearance and golden color, you can coat products with milk or egg before baking

QUALITY ASSURANCE

Our company not only follows the current legislation, but is also certificated according to ISO 9001:2015, ISO 22000:2018, IFS & BRC standards, following strict guidelines, aiming at production of safe and high-quality products. All preventive actions and quality control are performed from specialized staff with the help of contemporary equipment.

WARNING
Defrosting and baking time may change according with the type of the available machine. For more specific instructions see below the code. For more information contact with the Quality Department of the company.
